

SurCode™ for DOLBY® PRO LOGIC II

SurCode for Dolby Pro Logic II

SurCode for Dolby Pro Logic II allows broadcasters, game developers, video producers, and audio professionals everywhere to easily encode 5.1 surround mixes into stereo soundfiles. Surround ambiances, sound effects, and music stems can all be pre-encoded for delivery within stereo cues, and the resulting mix is completely stereo-compatible. SurCode for Dolby Pro Logic II decodes back to multichannel audio files, making it the perfect compliment to post production LtRt needs and multichannel field surround microphones.

Dolby Pro Logic II encoding is the world's fastest growing matrix surround technology, and can be decoded by virtually every Dolby Digital home theater system sold today. Media encoded with SurCode for Dolby Pro Logic II is backwards compatible with the millions of Dolby Pro Logic receivers and decoders in use worldwide. SurCode for Dolby Pro Logic II is fully certified allowing the use of the associated Dolby trademarks and logos on content produced with this plug-in.

Provided as a cross platform plug-in suite, SurCode for Dolby Pro Logic II is now a unified encoder and decoder for:

- Pro Tool Mac + Windows
- VST Mac + Windows
- Standalone Mac + Windows
- Now all on one iLok license!

Unlike other Pro Logic II "compatible" products, SurCode for Dolby Pro Logic II is fully licensed for both encode and decode. And, with an all-in-one installer, users can choose when and how to use SurCode for Dolby Pro Logic II, giving you powerful multi-platform deployment at no additional charge.

PRO TOOLS

- LtRt downmix - full compatibility
- Encode and Decode simultaneously in real-time
- Multi-DAW, multi-instance support
- Flexible license handling
- Certified: Use Dolby logos and trademarks on content produced with this plug-in or application
- Perfect compliment to SurCode for Dolby E
